

I am constantly trying to improve myself and learn new technologies in the fields of software development, data science, finance and especially mobile programming. The projects I wrote with C, C++ and Java, android applications I developed using Kotlin, Xml, Sql and Java and many more projects are available in my github account.

I want to put the technical and theoretical knowledge I have gained so far into practice and while doing so, I want to both add value to your company and move myself further. I am a team player, responsible and have strong communication skills.

With the understanding of "There is nothing I don't know, there are only things I haven't learned." I continue to improve myself continuously and never give up. It will be a great opportunity for me to work in your company. thank you for your interest and present my regards.

• Education Information

- 42 İstanbul - Software and Computer Engineering / 2023 - 2025
- Istanbul Gelisim University - Management Information Systems / 2021 - 2025

• Experiences

- Tencent Holdings Limited - Server Technician / 01.04.2023 - 01.05.2023
- Paka Technology - System Support Intern / 12.08.2024 - 23.09.2024

Programming Languages

- C (expert)
- Git (expert)
- Java (middle)
- C++ (middle)
- Python (middle)
- Bash Script (middle)
- Kotlin (begin)
- XML (begin)
- C# (begin)

Programming Skills

- Multi Process
- Multi Thread
- Mobile Application Development
- Computer Networks
- Object Oriented Programming
- Data Science and Visualisation

Platforms

- Linux
- Pandas
- Numpy
- Android
